List of Experiments (V Semester)

1. To determine the moisture content of soil sample by oven drying method.
2. To determine the specific gravity of soil solids by density bottle method.
3. To determine the specific gravity of soil solids by pycnometer method.
4. To determine the liquid limit of given soil using Casagrande's liquid limit apparatus.
5. To determine the plastic limit of soil.
6. To determine the shrinkage limit of given soil.
7. To determine the particle size distribution of soil sample dry sieve analysis.
8. To determine the coefficient of permeability of soil by falling head permeability test.
9. To determine the OMC and corresponding maximum dry density of given soil sample using "Light Compaction Test".
10. To determine the OMC and corresponding maximum dry density of given soil sample using "Heavy Compaction Test".
11. To determine the in-situ density of soil by using core cutter method.
12. To determine the in-situ density of soil by using sand replacement method.
